SREEKUTTAN SREEDHARAN THAMPI

Backend Software Engineer — Go, Cloud-Native Systems

Address: Stuttgart, Germany
Email: sreekuttan3196@gmail.com
Phone: +49 15730170349

PROFESSIONAL EXPERIENCE

09/2025 – present

Software Developer (Full-time)

IT Designers Gruppe, Stuttgart

- Development of Go backend services for a multi-tenant, cloud-native fleet management and vehicle operations platform; modular monolith architecture with independently deployed microservices.
- Designed and implemented a policy-based authorisation system from scratch, handling fine-grained access control across tenant and user roles.
- Design and implementation of RESTful APIs (documented with Swagger / OpenAPI) applying idiomatic Go patterns: interfaces, explicit error handling, and context propagation.
- PostgreSQL data layer exposed via GraphQL using PostGraphile; audit history maintained with pgmemento; ScyllaDB as primary high-throughput datastore; Redis for caching and session management.
- Integration of identity and access management using Keycloak (current) and Zitadel (prior); S3-compatible object storage for the platform's media service.
- Use of Temporal for reliable workflow orchestration across distributed backend processes.
- Contribution to a React/Redux/Vite frontend feature, extending responsibility beyond backend scope when required.
- Operation of services on a Kubernetes cluster; participation in GitOps-based deployments via Terraform, Kargo, and Argo CD.
- Maintenance of CI/CD pipelines using GitHub Actions.

05/2025 – 07/2025

Software Developer (Working Student)

Mercedes-Benz AG, Stuttgart

- Further development of the vehicle planning and dispatching web application built during the Master's thesis.
- Development of a new vehicle hub management application using Django (Python), TypeScript, and Angular.

11/2024 – 04/2025

Software Developer (Master's Thesis)

Mercedes-Benz AG, Stuttgart

- Design and development of an MVP web application for vehicle fleet planning and dispatching.
- Architecture based on modular monolithic and Clean Architecture principles; CQRS pattern applied in the backend.
- Technology stack: .NET Core 8, Angular, PostgreSQL, Entity Framework, RabbitMQ, Docker.
- Creation of UI wireframes (Figma) and UML diagrams; application of TDD and Clean Code practices throughout.

05/2024 – 10/2024

Software Developer (Internship)

Mercedes-Benz AG, Stuttgart

- Automation of Jira issue creation and management using Python and REST APIs.
- Development of a real-time fleet calendar in Python, integrated into Confluence via the Confluence REST API.

03/2023 – 04/2024 **Software Developer (Working Student)**

Deutsche Automobil Treuhand GmbH (DAT), Germany

- Development of a test-client application to automate SOAP API testing using .NET Core 6, C#, and WPF.
- Design and development of an XML comparison tool with .NET Core 6.
- Management of CI/CD pipelines with Jenkins; version control with Git.

11/2019 – 08/2022 **Software Developer**

Infosys Private Ltd, India

- Design and development of an e-commerce web application for a global CPQ sales configurator (elevator manufacturer) using C#, ASP.NET MVC, Angular, WCF, and MS SQL Server.
- Backend API development, responsible for 50%+ of the RESTful API surface; integration with Angular frontend.
- Database design, including stored procedures, for efficient data access.
- Delivery within agile SCRUM sprints using GitHub CI/CD and Azure Boards.

EDUCATION

2023 – present **MSc — Electrical & Information Technology**

University of Applied Sciences Darmstadt, Germany

Specialisation: Embedded Systems and Microelectronics · Grade: 1.8

2015 – 2019 **BTech — Electronics & Communication Engineering**

Government Engineering College Kozhikode, India

TECHNICAL SKILLS

Languages	Go (primary), C# (.NET Core), Python, TypeScript, JavaScript, SQL
Backend	REST APIs, GraphQL (PostGraphile), Temporal, RabbitMQ, CQRS, Clean Architecture, Modular Monolith, Microservices, OpenAPI / Swagger, WCF
Databases	ScyllaDB, PostgreSQL, pgmemento, Redis, MS SQL Server
Auth & Storage	Keycloak, Zitadel, Policy-based authorisation, S3-compatible object storage
Frontend	React, Redux, Vite, Angular, Tailwind CSS
Infrastructure	Kubernetes, Terraform, Argo CD, Kargo, Docker, GitHub Actions, Jenkins
Tools	Git, YouTrack (Kanban), Jira, Confluence, Figma, Postman, Linux, Azure Boards
AI-assisted Dev	Claude (incl. custom skill/prompt setup for code workflows), GitHub Copilot; experienced in integrating AI tooling into daily development practice for code generation, review, and documentation

PERSONAL DATA

Driving Licence	Class B (German licence)
Languages	English — Fluent | German — B1 (Intermediate)
